

# SALLAPUDI VINUTHNA KUMAR

FULL STACK DEVELOPER

PH : +91 90149 08994 | E-Mail : vinuthna433434@gmail.com | Website : vinnu.wieetech.com

---

Full Stack Developer with **3+ years** of professional experience in designing, developing, and deploying scalable web applications. Strong expertise in **React, Python, PostgreSQL, and MySQL**, with hands-on experience building responsive frontends, robust backend APIs, database-driven applications, and end-to-end software solutions. Skilled in translating business requirements into efficient, maintainable, and user-focused applications, with a strong focus on performance, scalability, and clean architecture.

## EXEPERINCE :

**IKRGY INFOTECH PVT. LTD.**

**(JULY 2023 – PRESENT)**

Working as a **Full Stack Developer** with hands-on experience in developing and maintaining multiple web applications and software projects. Responsible for both frontend and backend development, including designing responsive user interfaces, developing backend APIs, integrating databases, implementing business logic, and troubleshooting application issues.

- Developed and maintained multiple projects using React, Python, PostgreSQL, and MySQL.
- Built responsive, scalable, and user-friendly frontend applications using React and modern web development practices.
- Designed and developed backend services, REST APIs, business logic, and database integrations using Python.
- Worked extensively with PostgreSQL and MySQL for database design, queries, data management, and application integration.
- Participated in the complete software development lifecycle, from requirement analysis and development to testing, deployment, and maintenance.
- Worked across multiple projects and adapted solutions based on different business requirements and technical challenges.
- Handled application maintenance, debugging, performance improvements, and production issue resolution.
- Coordinated with team members, assigned and monitored development tasks, reviewed progress, and supported the team in achieving project objectives.
- Collaborated with stakeholders and team members to understand requirements and deliver reliable, production-ready solutions.

## SKILLS

- **Backend:** Python (FastAPI)
- **Frontend:** HTML, CSS, JavaScript, React
- **Databases:** MySQL, PostgreSQL, MongoDB
- **IoT & Hardware:** Arduino, Esp32, MQTT, SMTP
- **Concepts & Tools:** REST APIs, MVC Architecture, Authentication & Authorization, Database Design, API Integration

## PROJECTS :

### SREE PUDAMI — PRODUCT SHOWCASE PLATFORM

- Developed the complete end-to-end application, covering frontend, backend APIs, database integration, product management, and overall application workflow.
- Implemented an automatically generated QR code system, allowing users to scan product-specific QR codes and instantly access detailed product information.
- Built a responsive and user-friendly product showcase experience focused on easy product discovery and digital presentation.

### NYROGPT — AI CONVERSATIONAL PLATFORM

- Developed the complete end-to-end application, including frontend, backend services, database integration, AI/LLM integration, and conversational workflows.
- Built a ChatGPT-inspired conversational platform that processes user requests and generates relevant AI-powered responses.
- Implemented chat workflows and supporting APIs to provide a seamless conversational experience and manage user interactions.

### EMS — EVENT MANAGEMENT & TICKET BOOKING PLATFORM

- Developed the complete end-to-end event management platform, covering frontend, backend, database, booking workflows, and transaction-related functionality.
- Implemented event creation, ticket booking, organizer-based seat allocation, and event management workflows.
- Developed the application flow for managing users, events, seating, bookings, and platform-based transactions.

### ERP + POS — ENTERPRISE RESOURCE PLANNING & POINT OF SALE

- Developed the complete ERP application, covering frontend, backend, database integration, inventory workflows, business operations, and reporting functionality.
- Implemented comprehensive inventory management, stock tracking, operational workflows, and business reports.
- Developed the multi-tenant application workflow to support multiple organizations with role-based access and organization-specific data.

## **HALO — INTERNAL SYSTEM & SOFTWARE COMPLIANCE PLATFORM**

- Developed the complete end-to-end application, including frontend, backend, database integration, system monitoring workflows, and alert management.
- Implemented functionality to identify licensed and unlicensed software across employee systems and generate compliance alerts.
- Developed workflows for administrators and employees to review, update, and resolve software-related alerts and compliance issues.

## **AQUA PULSE — IOT-BASED AQUACULTURE MONITORING PLATFORM**

- Designed and developed the IoT device and hardware connections, including sensor integration for collecting water parameters such as temperature, pH, water level, and nitrogen-related measurements.
- Developed the backend data pipeline to receive sensor readings from the device, process the data, and store it in the database for application-level monitoring.
- Implemented the foundation for water-quality monitoring and alert workflows to support site owners and assigned employees.

## **ICMS — INTEGRATED CAMPUS MANAGEMENT SYSTEM**

- Developed key modules of the complete campus management platform, with primary contributions to the Front Desk and Admissions modules.
- Implemented admission workflows for managing prospective students, applications, student information, and related campus processes.
- Developed Front Desk functionality to manage visitor interactions, enquiries, and day-to-day campus reception operations.

## **EDUCATION**

### **B.Tech in Engineering**

Aditya College of Engineering and Technology

CGPA: 7.00

## **DECLARATION**

I hereby declare that the information provided above is true and correct to the best of my knowledge and belief.
